How to use the ViralURL Cloaking Section:

Video version of this tutorial at: http://ViralURL.com/video-cloakingsection.php

Welcome to the ViralURL Cloaking Section tutorial.

In this tutorial you will learn how the Cloaking Section works.

This is the Cloaking Section:

Here you can see the Cloaking Section is the first option on the left side of the button menu bar.

We choose the Add Url submenu of the Cloaking Section.

Cloaking Section → Add URL Section:

In the Add Url section you only have to enter the URL, the keyword, page title & comments are optional.

Here is an example:

URL: <u>http://viralurl.bfmscript.hop.clickbank.net</u> Keyword: BFM (short for Butterfly Marketing) Page Title: We recommend - Butterfly Marketing Enable Credits: Yes Viralbar to be placed at: Top

You should know what "Enable Credits" is. When you click on the question mark next to **Enable Credits [?]:** it opens a popup window with the following message...

About Enable Credits

When "Enable Credits" is set to "Yes" an ad is shown in the middle of your Viralbars and you will earn credits to show your own ads randomly on other members Viralbar.

When it's set to "No", no ad is shown on your Viralbars.

Free & Silver members will earn 0.5 credits and Gold, Platinum, Diamond & Elite members will earn 1.0 credit with each Viralbar display. Free & Silver members can manage 1 Viralbar ad in the 'Ad Credits Section' and Gold, Platinum, Diamond & Elite members up to 5.

Viralbar to be placed at: Top \rightarrow the Viralbar will sit at the top of the page.

Click on the "Add URL" button to complete the process of the "Add Url" section.

Then after that you will see your link below the **Add Url** button with a **Copy Url to Clipboard** button as shown in the picture below...

The address <u>http://viralurl.bfmscript.hop.clickbank.net</u> converted now to: <u>http://viralurl.com/Suraj/BFM</u>

Click on the "**Copy URL To Clipboard**" button or copy the URL manually and open it with your browser to make sure that is it ok.

Note: Your URL to use is now "<u>http://viralurl.com/Suraj/BFM</u>" and not anymore "<u>http://viralurl.bfmscript.hop.clickbank.net</u>".

The reason is, because with the "<u>http://viralurl.bfmscript.hop.clickbank.net</u>" link anyone can easily see that it's an affiliate link and change the affiliate ID to his or her own.

But with "<u>http://viralurl.com/Suraj/BFM</u>" no one can see that and this way you will stop losing affiliate commissions.

Also... with "<u>http://viralurl.com/Suraj/BFM</u>" you can earn Viralbar ad credits, build a downline and earn commissions all while promoting the original URL.

On the picture below you can see that URL is shown as <u>http://viralurl.com/Suraj/BFM</u> and the Viralbar appears on top with a random ad for increasing you Viralbar ad credits. This bar is due to the **Enable Credits** and **Viralbar to be placed at** option we chose before. If you select **Enable Credits** as "No" then this ad will not appear in the Viralbar and if you select **Viralbar to be placed at** as bottom then this Viralbar will appear at to bottom of the page.

Your Affiliate Landing Page:

If you want to be sure if your affiliate link is working or not, then go to the bottom of the above pages and click on the "**Please Send Me To The Private Member's Area**" link as shown in the picture below...

After you click on the link, the webpage below opens. On this ClickBank page, your Viralbar will also appear on the top of this page for few seconds and will then disappear.

Now let's select the **Current Url's** submenu of the **Cloaking Section**:

After you selected the **"Current Url's"** submenu of the **Cloaking Section**, you will see the webpage as shown on the next page and in this page you can see all URL's you have cloaked so far.

On that page you have several options...

You can click on "Copy" to copy the short / cloaked URL straight into your computers clipboard. By pressing CTRL+V on your keyboard you can then paste it anywhere you like.

You can click on "Stats" to view the complete statistics for that URL.

You can click on "Edit" to edit the URL settings.

You can click on "Delete" to remove that URL as well as all statistics for it.

But right now, let's search for the URL with the keyword "BFM" and click on the option "Stats".

The Stats option will show you all information (Statistics for URL) of your link.

You will see how many people have viewed your pages per day, month and year.

You will also see how many visitors are unique and how many total visitors there are (including return visitors).

Additionally this page will show you the referring web pages of your visitors.
